VOLUME CONTENTS

Number 1

SPECIAL ISSUE: IMAGE REGISTRATION

A. A. Goshtasby and J. Le Moigne	1	Image registration: Guest Editors' introduction
K. Rohr	3	Extraction of 3d anatomical point landmarks based on invariance principles
D. M. Mount, N.S. Netanyahu and J. Le Moigne	17	Efficient algorithms for robust feature matching
C. Shekhar, V. Govindu and R. Chellappa	39	Multisensor image registration by feature consensus
D. Fischer, P. Kohlhepp and F. Bulling	53	An evolutionary algorithm for the registration of 3-d surface representations
C. Studholme, D. L. G. Hill and D. J. Hawkes	71	An overlap invariant entropy measure of 3D medical image alignment
M. Gabrani and O. J. Tretiak	87	Surface-based matching using elastic transformations
J. C. Gee	99	On matching brain volumes
M. Chen, T. Kanade, D. Pomerleau and H. A. Rowley	113	Anomaly detection through registration
H. Lester and S. R. Arridge	129	A survey of hierarchical non-linear medical image registration

Number 2

D. Shen and H. H. S. Ip	151	Discriminative wavelet shape descriptors for recognition of 2-D patterns
Y. Lei and K. C. Wong	167	Detection and localisation of reflectional and rotational symmetry under weak perspective projection
O. Chutatape and L. Guo	181	A modified Hough transform for line detection and its performance
P. Scheunders and S. De Backer	193	High-dimensional clustering using frequency sensitive competitive learning
J. J. Guerrero and C. Sagüés	203	Camera motion from brightness on lines. Combination of features and normal flow

V. E. Ramesh and M. Narasimha Murthy 217 Off-line signature verification using genetically optimized weighted features

E. Bribiesca 235 A new chain code

Special Issue: Languages for Image Processing and Pattern Recognition

N. G. Bourbakis 253 Languages for image processing and pattern recognition: Preface

S. F. Thompson and A. Rosenfeld 255 Parallel array grammars as models for the growth of planar patterns

K. Morita and K. Imai 267 Uniquely parsable aray grammars for generating and parsing connected patterns

K. Aizawa and A. Nakamura 277 Parsing of two-dimensional images represented by quad-tree adjoining grammars

R. Siromoney, K. G. Subramanian, V. R. Dare and D. G. Thomas 295 Some results on picture languages

K. M. Hussein, A. Agarwal, A. Gupta and P. S. P. Wang 305 A knowledge-based segmentation algorithm for enhanced recognition of handwritten courtesy amounts

N. G. Bourbakis and C. Alexopoulos 317 A fractal-based image processing language: formal modeling

Number 3

A. A. Y. Mustafa, L. G. Shapiro and M. A. Ganter 339 3D object identification with color and curvature signatures

H.-K. Kong, Y.-C. Myung and J.-S. Choi 357 3-D analysis of projective textures using structural approaches

A. Giraldo, A. Gross and L. J. Latecki 365 Digitizations preserving shape

A. Laurentini 377 Computing the visual hull of solids of revolution

D.-M. Tsai and C.-F. Tseng 389 Surface roughness classification for castings

A. Gross and L. J. Latecki 407 Digital geometric methods in document image analysis

K. Hattori and M. Takahashi 425 A new nearest-neighbor rule in the pattern classification problem

Special Issue: Colour and Texture Anaylsis

A. D. Bimbo	433	Editorial: Special Issue on Color and Texture Analysis
S. V. Assche, W. Philips and I. Lemahieu	435	Lossless compression of pre-press image using a novel colour decorrelation
G. V. De Wouwer, P. Scheunders, S. Livens and D. V. Dyck	443	Wavelet correlation signatures for color texture characterization
T. Gevers and W. M. Smeulders	453	Color based object recognition
E. Boldrin and R. Schettini	465	Faithful cross-media color matching using neural networks
T. Ojala and M. Pietikäinen	477	Unsupervised texture segmentation using feature distributions
D. Chetverikov	487	Texture analysis using feature based pairwise interaction maps
J. R. S. Alvarez and J. B. Subirana-Vilanova	503	Texture frame curves and regions of attention using adaptive non-cartesian networks
P. Pala and S. Santini	517	Image retrieval by shape and texture

Number 4

W. P. Yu, G. W. Chu and M. J. Chung	529	A robust line extraction method by unsupervised line clustering
L. Zhao and Y.-H. Yang	547	Theoretical analysis of illumination in PCA-based vision systems
T.-H. Kim, T.-H. Cho, Y. S. Moon and S. H. Park	565	Visual inspection system for the classification of solder joints
K. S. Kumar and U. B. Desai	577	Joint segmentation and image interpretation
Z. Kato, J. Zerubia and M. Berthod	591	Unsupervised parallel image classification using Markovian models
S. Baheerathan, F. Albregtsen and H. E. Danielsen	605	New texture features based on the complexity curve
T. Kämpke and R. Kober	619	Discrete signal quantization
L. Guo and O. Chutatape	635	Influence of discretization in image space on Hough transform
A. Ting, M. K. H. Leung	645	Form recognition using linear structure

M. R. Mahzoun, J. Kim, S. Sawazaki, K. Okazaki and S. Tamura 657 A scaled multigrid optical flow algorithm based on the least RMS error between real and estimated second images

M. Flasiński and J. Jurek 671 Dynamically programmed automata for quasi context sensitive languages as a tool for inference support in pattern recognition-based real-time control expert systems

D. Zhang and W. Shu 691 Two novel characteristics in palmprint verification: datum point invariance and line feature matching

K. Aas, L. Eikvil and R. B. Huseby 703 Applications of hidden Markov chains in image analysis

Number 5

D. T. Pham and V. Aslantas 715 Depth from defocusing using a neural network

Y. K. Ham and R.-H. Park 729 3D object recognition in range images using hidden markov models and neural networks

J.-H. Jang and K.-S. Hong 743 Binarization of noisy gray-scale character images by thin line modeling

S. Jaggi, W. C. Karl, S. G. Mallat and A. S. Willsky 753 Silhouette recognition using high-resolution pursuit

Y. Chitre and A. P. Dhawan 773 *M*-band wavelet discrimination of natural textures

S. Messelodi and C. M. Modena 791 Automatic identification and skew estimation of text lines in real scene images

S. J. Perantonis, B. Gatos and N. Papamarkos 811 Block decomposition and segmentation for fast Hough transform evaluation

H. D. Cheng and Y.-H. Chen 825 Fuzzy partition of two-dimensional histogram and its application to thresholding

A. I. Bykov, L. G. Zerkalov and M. A. R. Pineda 845 Index of a point of 3-D digital binary image and algorithm for computing its Euler characteristic

L. Zhao and Y.-H. Yang 851 An efficient algorithm to compute eigenimages in PCA-based vision systems

F. Jurie 865 A new log-polar mapping for space variant imaging. Application to face detection and tracking

A. Farina, Z. M. Kovács-Vajna and A. Leone 877 Fingerprint minutiae extraction from skeletonized binary images

O. Tsujii, M. T. Freedman and S. K. Mun 891 Classification of microcalcifications in digital mammograms using trend-oriented radial basis function neural network

J. Majumdar 905 Corrigendum

Number 6

D. Ghosh and A. P. Shivaprasad 907 An analytic approach for generation of artificial handprinted character database from given generative models

Z. Lu, Z. Chi, W.-C. Siu and P. Shi 921 A background-thinning-based approach for separating and recognizing connected handwritten digit strings

J. J. Zhou and H. Yan 935 Extracting strokes from static line images based on selective searching

G. Agam and I. Dinstein 947 Regulated morphological operations

T. K. Dinda, K. S. Ray and M. K. Chakraborty 973 Fuzzy relational calculus approach to multidimensional pattern classification

G. Ritter and K. Gaggermeier 997 Automatic classification of chromosomes by means of quadratically asymmetric statistical distributions

P.-H. Suen and G. Healey 1009 Modeling and classifying color textures using random fields in a random environment

C. Arcelli 1019 Topological changes in grey-tone digital pictures

N. Guil, J. M. Gonzalez-Linares and E. L. Zapata 1025 Bidimensional shape detection using an invariant apporach

Q. Yang and S. D. Ma 1039 Matching using schwarz integrals

C. Bahlmann, G. Heidemann and H. Ritter 1049 Artificial neural networks for automated quality control of textile seams

J. Han and W. Gao 1061 Robust telephone speech recognition based on channel compensation

F. Jurie 1067 Robust hypothesis verification: application to model-based object recognition

Number 7

G. Chen and T. D. Bui 1083 Invariant Fourier-wavelet descriptor for pattern recognition

N. Zahid, M. Limouri and A. Essaid 1089 A new cluster-validity for fuzzy clustering

K.-F. Chan and D.-Y. Yeung	1099	Recognizing on-line handwritten alphanumeric characters through flexible structural matching
M. Okamoto and K. Yamamoto	1115	On-line handwriting character recognition using direction-change features that consider imaginary strokes
E. A. Maharaj	1129	Comparison and classification of stationary multivariate time series
N. M. Adams and D. J. Hand	1139	Comparing classifiers when the misallocation costs are uncertain
S. Kundu	1149	Gravitational clustering: a new approach based on the spatial distribution of the points
C. Brumbley and C.-I. Chang	1163	An unsupervised vector quantization-based target subspace projection approach to mixed pixel detection and classification in unknown background for remotely sensed imagery
G. Bebis, G. Papadourakis and S. Orphanoudakis	1175	Curvature scale-space-driven object recognition with an indexing scheme based on artificial neural networks
F. Y. Shih and W.-T. Wong	1203	A one-pass algorithm for local symmetry of contours from chain codes
R. C. Wilson and E. R. Hancock	1211	Consistent topographic surface labelling
G. Borgefors, I. Nyström and G. S. Di Baja	1225	Computing skeletons in three dimensions
J. Miao, B. Yin, K. Wang, L. Shen and X. Chen	1237	A hierarchical multiscale and multiangle system for human face detection in a complex background using gravity-center template
T. Pham and M. Wagner	1249	Ambiguity reduction in speaker identification by the relaxation labelling process
M. L. Williams, R. C. Wilson and E. R. Hancock	1255	Deterministic search for relational graph matching
X. Jiang and H. Bunke	1273	Optimal quadratic-time isomorphism of ordered graphs
T. Hogg, D. Rees and H. Talhami	1287	Explicit inversion: an approach to image analysis
M. Daoudi, F. Ghorbel, A. Mokadem, O. Avaro and H. Sanson	1299	Shape distances for contour tracking and motion estimation

Number 8

K. Kuroda, K. Harada and M. Hagiwara	1307	Large scale on-line handwritten Chinese character recognition using successor method based on stochastic regular grammar

J. Hu, H. Yan and M. Sakalli	1317	Locating head and face boundaries for head–shoulder images
G. C. Charters and J. Graham	1335	Trainable grey-level models for disentangling overlapping chromosomes
C. Nikou, F. Heitz and J.-P. Armspach	1351	Robust voxel similarity metrics for the registration of dissimilar single and multimodal images
M. S. Drew, J. Wei and Z.-N. Li	1369	Illumination–invariant image retrieval and video segmentation
S. Singh	1389	Noise impact on time-series forecasting using an intelligent pattern matching technique
T.-M. Tu, H.-C. Shyu, C.H. Lee and C.I. Chang	1399	An oblique subspace projection approach for mixed pixel classification in hyperspectral images
S.-C. Huang and Y.-N. Sun	1409	Polygonal approximation using genetic algorithms
L. Zhao and Y.-H. Yang	1421	Mosaic image method: a local and global method
P. Foggia, C. Sansone, F. Tortorella and M. Vento	1435	Multiclassification: reject criteria for the Bayesian combiner
P. Vasseur, C. Pegard, E. Mouaddib and L. Delahoche	1449	Perceptual organization approach based on Dempster–Shafer theory
S. R. Gunn	1463	On the discrete representation of the Laplacian of Gaussian

Number 9

SPECIAL ISSUE: RANDOM SETS

E. R. Dougherty and I. S. Molchanov	1473	Special Issue on Random Sets. Introduction
J. L. Davidson, N. Cressie and X. Hua	1475	Texture synthesis and pattern recognition for partially ordered Markov models
N. Friel and I. S. Molchanov	1507	A new threshold technique based on random sets
P. Hall and I. S. Molchanov	1519	Corrections for systematic boundary effects in pixel-based area counts
J. C. Handley and E. R. Dougherty	1529	Maximum-likelihood estimation and optimal filtering in the nondirectional, one-dimensional binomial germ-grain model
C. Hess	1543	Conditional expectation and martingales of random sets
W. S. Kendall and E. Thönnes	1569	Perfect simulation in stochastic geometry

G. Last and M. Holtmann	1587	On the empty space function of some germ-grain models
H. Le and C. G. Small	1601	Multidimensional scaling of simplex shapes
T. Lewis, R. Owens and A. Baddeley	1615	Averaging feature maps
M. N. M. van Lieshout	1631	Size–biased random closed sets
J. Mecke	1645	On the relationship between the 0-cell and the typical cell of a stationary random tessellation
M. Nippe and J. Ohser	1649	The stereological unfolding problem for systems of homothetic particles
F. Sand and E. R. Dougherty	1657	Robustness of granulometric moments
N. D. Sidiropoulos	1667	On the tractability of estimating the germ process of certain germ-grain random set models and related problems
W. Weil	1675	Intensity analysis of Boolean models

Number 10

C. Colombo and A. D. Bimbo	1685	Color-induced image representation and retrieval
W-S. Chou	1697	Classifying image pixels into shaped, smooth, and textured points
T. Kondo and H. Yan	1707	Automatic human face detection and recognition under non-uniform illumination
A. R. Jiménez, A. K. Jain, R. Ceres and J. L. Pons	1719	Automatic fruit recognition: a survey and new results using Range/Attenuation images
N. Rajpal, S. Chaudhury and S. Banerjee	1737	Recognition of partially occluded objects using neural network based indexing
L. Wiskott	1751	Segmentation from motion: combining Gabor- and Mallat-wavelets to overcome the aperture and correspondence problems
C. Knoll, M. Alcañiz, V. Grau, C. Monserrat and M. C. Juan	1767	Outlining of the prostate using snakes with shape restrictions based on the wavelet transform (Doctoral Thesis: Dissertation)
G. Bebis, M. Georgiopoulos, N. da Vitoria Lobo and M. Shah	1783	Learning affine transformations
P. S. Wu and M. Li	1801	Supervised and unsupervised fuzzy-adaptive hamming net

Rapid And Brief Communications

S. M. Yamany, M. N. Ahmed and A. A. Farag	1817	A new genetic-based technique of matching 3-D curves and surfaces
E. N. Zois and V. Anastassopoulos	1821	Fusion of correlated decisions for writer verification
	I	Call for Papers

Number 11

SPECIAL ISSUE: FUZZY IMAGE PROCESSING

I. Bloch and A. L. Ralescu	1825	Special Issue of Pattern Recognition of Fuzzy Image Processing
A. Steudel and M. Glesner	1827	Fuzzy segmented image coding using orthonormal bases and derivative chain coding
F. Russo	1843	Hybrid neuro-fuzzy filter for impulse noise removal
P. Lambert and T. Carron	1857	Symbolic fusion of luminance-hue-chroma features for region segmentation
I. Bloch	1873	On fuzzy distances and their use in image processing under imprecision
M. Barni and R. Gualtieri	1897	A new possibilistic clustering algorithm for line detection in real world imagery
O. Strauss	1911	Use the Fuzzy Hough transform towards reduction of the precision/uncertainty duality
A. L. Ralescu and J. G. Shanahan	1923	Perceptual organization for inferring object boundaries in an image

Number 12

J-S. Lee, O-J. Kwon and S-Y. Bang	1935	Highly accurate recognition of printed Korean characters through an improved two-stage classification method
H-P. Chiu and D-C. Tseng	1947	A novel stroke-based feature extraction for handwritten Chinese character recognition
J. M. Sanchiz and F. Pla	1961	Feature correspondence and motion recovery in vehicle planar navigation
B. T. Messmer and H. Bunke	1979	A decision tree approach to graph and subgraph isomorphism detection

R. Krishnan, G. Sivakumar and P. Bhattacharya	1999	Extracting decision trees from trained neural networks
M. R. Rezaee, B. Goedhart, B. P. F. Lelieveldt and J. H. C. Reiber	2011	Fuzzy feature selection
S. Madhvanath and V. Govindaraju	2021	Local reference lines for handwritten phrase recognition
J-B. Huang, Z. Chen and J-Y. Lin	2029	A study on the dual vanishing point property
M. Yoshimura and S. Oe	2041	Evolutionary segmentation of texture image using genetic algorithms towards automatic decision of optimum number of segmentation areas
X-J. Wu, Y-J. Zhang and L-Z. Xia	2055	A fast recurring two-dimensional entropic thresholding algorithm

Rapid and Brief Communications

P. Klausmann, K. Kroschel and D. Willersinn	2063	Performance prediction of vehicle detection algorithms
K. Voss, H. Suesse, W. Ortmann and T. Baumbach	2067	Shift detection by restoration
A. Howard and C. Padgett	2069	A generalized approach to real-time pattern recognition in sensed data
S. Qiang and A. Chouchoulas	2073	Combining rough sets and data-driven fuzzy learning for generation of classification rules
S. Bermejo and J. Cabestany	2077	Adaptive soft k-nearest-neighbor classifiers
M. Carozza and S. Rampone	2081	Function approximation from noisy data by an incremental RBF network
